ROYAL VISITS TO THE SICK.

Whenever there is sickness in a house and the patient receives a visit from his sovereign bis case is regarded as absolutely hopeless, and it is probable that the Duke of Devonshire, who has been so seriously ill at Devonshire House, in Pic-cadilly, had this in mind when he declined the offer cadilly, had this in mind when he declined the effer made to him by the King the other day to pay him a visit. The cable dispatches implied that the duke's action in declining the royal visit was prompted by resentment, whereas nothing could be further from the truth. LORD CRAVEN'S ANCESTRAL HOME.

American dollars, which have furnished the means of reroofing so many of the ancestral homes of the British aristocracy, are now contributing to similar work of restoration at Coombe Abbey, the country seat near Coventry of Lord and Lady Craven, son-in-law and daughter of Mr. and Mrs. Bradley Mar-tin, of New York, who, deeply devoted to their daughter and very fond of their son-in-law, have given large sums of money for the restoration of the fortunes of the Earldom of Craven. In fact, it is understood that Coombe Abbey is being entirely reroofed at their expense. Once a great Cistercian monastery, it has been since 1611 in the possession of the Craven family, and Princess Elizabeth, daughter of James I, and sister of Charles I, spent much of her girlhood and received her education there. Only when it became known that it was part of the gunpowder plot conspiracy to abduct and carry her to London, and there to declare her Oleen, was she removed to County for soften Queen, was she removed to Coventry for safety. ARBITRATION REASONS.

SPEECH BY MR. CHOATE.

Dr. Drago Defends His Doctrine-Spain's New Desire.

The Hague, July 18.—The sitting of the peace conference to-day has been one of the most Important yet held, both for interest in the questions discussed and for the powerful speeches delivered by Joseph H. Choate, Luis M. Drago, of Argentina, and Perez Triana, of Colombia, while in addition Spain made a declaration which attracted much attention as revealing the desire of the Spanish government to assume a kind of moral tutelage over the Latin-American countries.

Spain's declaration says that that country adheres to the principles of moderation, which inspired the American proposition limiting force for the collection of public debts, these being the have followed and will always follow.

"Spain sees to-day," It says, "as an accomplished fact what she has ardently desired since the last conference, namely, the presence at The Hague of the representatives of the Latin-American nations, which are sisters of ours in language and in race. Spain is disposed to accept every proposition tending within the limits and peaceful development of the Spanish-American republics. The doctrine just enunciated by its illustrious author, Dr. Drago, was not included in the programme; therefore, it could not obtain our support, but as an carnest protest against possible wrong from the use of force it deserves all sympathy."

In closing his address Joseph H. Choate made an eloquent appeal to the nations to enter into a general convention, which ought to be entirely distinct and independent, for the settlement of

disputed questions arising in arbitration.
"At the proper time," he said, "we shall ask for an opportunity to explain our views on the project we offered for fortifying the present Permanent Court of Arbitration and for the organization therefrom of a tribunal which shall compel the confidence of nations and be the necessary sequel to the general arbitration agreement which we now offer."

REASONS FOR ATTITUDE.

Mr. Choate had previously stated reasons that had induced the American government to propose a general treaty of arbitration.

"The dangers and mischief threatening the world from constant preparation for war and the accumulattion of arms," he said, "have been somewhat mitigated by the excellent work of the first Peace Conference in recommending arbitration to the nations as a substitute for and the establishment at The Hague of a permanent court. "Since this time great events have occurred

and two terrible wars, which inflicted untold miseries upon many nations, have led to international agreements of arbitration, separately and in pairs. There is no reason why nations not agree all together to exactly the same

Mr. Choate then referred to the excellent work done inathis direction by the Pan-American conferences at Mexico City and Rio de Janeiro, and it was under these circumstances, he said, that the United States proposed general arbitration treatles corresponding in form and substance to the many individual treaties which had been entered into, including those negotiated by the United States in 1904, but reserving the right of the Senate to take part in any special agreement which might become necessary for carrying the treaty into effect in particular cases.

Mr. Choate's remarks were interrupted often

by the applause of his hearers, and when he was through he was warmly congratulated by many of the delegates.

DR. DRAGO'S ARGUMENT. The matter of the collection of debts occupied

the entire morning session of the sub-committee. Luis M. Drago (Argentine) delivered a long argumentative speech in support of his doc trine. He declared a great step backward would be taken by the acceptance of that part of the American proposal which allows appeals to force for the executing of disputed arbitral awards. By the acceptance of such a measure.

ing an understanding must be tried before reourse is had to the permanent court of arbitra-ion. The Venezuelan declaration ends with

these words: "It is understood that said differences are to be settled through peaceful means without re-course to coercive measures implying the emloyment of military or naval forces."

The committee dealing with the bombardment of undefended towns and villages approved today the Italian proposition forbidding such acts. Upon leaving the sitting Brigadier General Davis, one of the American delegates, remarked: Since the time of Julius Cæsar no example exlsts of an undefended town being bombarded, but the conference took three weeks to realize

URGES METHODIST WORLD UNION.

R. W. Perks, M. P., Would Have the Church Grapple Questions of the Day. London, July 18 .- At the annual conference

of the Wesleyan adherents, sitting in Wesley Chapel, Robert W. Perks, Member of Parliament for Lincolnshire, to-day presented the important proposition that the time had arrived when the Wesleyan forces throughout the world should bind themselves with a mighty bond and grap-ple with the great economic and social questions of the day. He suggested the establishment of Methodist bureaus in all ports of the world to deal with the questions of emigration and un-employed labor, and to build up a practical loan society and savings bank and other kindred institutions for mutual aid.

Mr. Perks declared that Methodism was a vast

religious freemasonry with world-wide riches and resources, only wanting the proper machinery to bec come a tremendous confederacy

for mutual self-help. No action was taken on the proposition thus presented, but the conference was greatly impressed with its possibilities.

Germany claims to have made a discovery of great importance for the lighting of railway trains. Up to the present, except in those rare cases where electricity is used, acetylene has been the principal illuminant. So far all efforts to adapt the use of incandescent gas to the conditions of railway traffic had falled. At last the difficulty has been surmounted by the obtaining of an incandescent gas tamp which will resist the roughest shocks and jostlings of railway carriages. Thirty-five thousand carriages on the Prussian and Hessian state lines will shortly be equipped with these lamps.
